

John B. Wyatt IV

Seeking Remote Only Developer Position

WORK EXPERIENCE

May 2015 – Present

Wyatt Tech Courses

Founder

Currently developing an enterprise video course platform for Linux and Chef in Rails with AWS. My first course is an introduction to Chef video course for developers and system administrators new to server automation.

November 2014 – May 2015

Los Angeles County

Application Developer I

Developed a bridge in Rails from a SQL Server mirror to Modern Web and Mobile Application Platforms using REST with JSON.

Developed a Wordpress plugin that fetches JSON data from a remote web server with AngularJS.

January 2013 – July 2013

University of California, Merced

Student Researcher

Researched clouding computing and virtualization.

PROJECTS

2017 **Published Chef Video Course**

Published 'Introduction to Chef', a full video guide on how to get started with server automation on my website WyattTechCourses.com and QuickStart Technologies, a Fortune 500 and government distributor.

2015-2017 **B2B Course Site**

WyattTechCourses.com Written in Rails, Bootstrap and AWS. Site has enterprise features such as group purchases, revoking, auditing, and PDF certificates (Prawn). Video is provided by Carrierwave with AWS S3. Email provided by ActiveMailer with SendGrid.

2014-15 **Rails Mobile Bridge**

Wrote a Rails bridge using jRuby and Torquebox to process data from a 3rd party API over a REST interface over to mobile applications.

2014 **Deploy Rails BlueBook 2014**

Published a book on manual and automating Linux Rails server deployments with Chef on Ubuntu Linux.

SCHOLARSHIPS, AWARDS, AND ASSOCIATIONS

2012-2013 **Member of SIAM, Linux Kernel Contributor**

2009-2010 **Member of Business Society, Dean's List**
